***Reasons for Allowance***

1. Claims 1-16 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1 and 16 are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose maintaining a regular credit count and a history credit count for each of the queues and periodically polling the history credit counts of the queues to identify candidates for arbitration and upon identifying no candidates for arbitration by polling the history credit counts, polling the regular credit counts of the queues to identify candidates for arbitration. It is noted that the closest prior art of record, Woo et al (USPUB 20030112817) discloses utilizing credit counters to determine when a queue can participate in an arbitration event (paragraph [0047]).

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
  - US Patent (6359861) to Sui et al discloses scheduling transmission of cells from buffers based on weight associated with credit (column 4, lines 2-9).
  - USPUB (20040179535) to Bertagna discloses selecting a queue for next packet transmission based on selection masks, priority-bandwidth selector and round-robin arbiter (paragraph [0021], lines 10-15).
